# HIP-9

Institute Last Out, First In Redelegations for Staking

-Current staking process is set up for First Out, First In when undelegating and redelegating One to stake with Validators.

-This creates delays if you undelegate One with the intent of removing them from the staking portal, and have undelegated multiple times over multiple epochs, but need to redelegate before the 7 epoch wait time is over.

-New proposal to reverse this, so last out is the first in for redelegation of One.
